

**Custom Report: Stock Rescue Inhaler** – The purpose of this report is to produce the number of incidents where a stock rescue inhaler was administered. [Senate Bill 127](#) (2021) authorized districts to stock and administer rescue inhalers.

**Selection Criteria:** The Infinite Campus toolbar will control the year for which the report will generate. A specific year must be selected – All Years is not a valid selection.

**KDE Contact:** [Angela McDonald](#), Office of Finance and Operations, Division of District Support

**Pathway:** KY State Reporting | KDE Reports | Stock Rescue Inhaler

*NOTE: Users must be granted access by local KSIS administrator before they will see this report.*

**Report criteria and output information:** The report will list the district name and if the stock rescue inhaler has been added correctly. The district line will report the total of incidents administered. Schools that have administered the stock rescue inhaler will have a count below the district line. The fields provided are Academic Year, District Number, District Name, School Number, School Name, Stock Rescue Inhaler Intervention Created in Campus and Number of Stock Rescue Inhaler Administered.

**Report Sample:** The report will generate in excel.

Academic Year	District Number	District Name	School Number	School Name	Stock Rescue Inhaler Intervention Created in Campus	Number of Stock Rescue Inhaler Administered
20212022	000	District Name			Yes	7
20212022	000	District Name	111	School 1		2
20212022	000	District Name	222	School 2		5

**Suggested report uses:**

- To ensure the district has created the health intervention of stock rescue inhaler.
- To monitor and report the number of incidents where a stock rescue inhaler was administered.
- To verify the number of incidents report is accurate to report on Open House.
